

X Tuff Slab Bolster

X Tuff Slab Bolster is a new rebar support manufactured using high-performance PC/ABS plastic for best-in-class strength and durability

Increased Strength and Durability:

Using a proprietary blend of high-performance PC/ABS plastic, X Tuff Slab Bolster is the leading alternative to metal rebar supports.

Features:

- Eliminates possibility of rusting associated with metal supports
- Concrete gray in color
- Offers unparalleled strength and durability
- Meets ACI-318 Building Code requirements
- Available in lengths from 30" to 10' and heights from 3/4" to 4"
- Manufactured in the U.S.
