

## Burke Precast Bar

Item #	Description	Blade Width Size	Bar Length	Weight (lbs.)
17715	Precast Bar	5"	56"	19 lbs.

There are “Copies”, but no equals! With the option of three different sizes, you can select the best Burke Bar for the size of the job. These are the perfect companion to any construction site or precast plant. Burke bars come in handy when you need to:

- Strip forms
- Remove a stud wall
- Pull nails or spikes
- Adjust a door jam
- Unstick panels
- Move panels
- Hundreds of uses

The Burke Bar family is built for long-lasting heavy use. The handle is made of rigid structural tube. The whole bar is made with 10% more steel than the competitors and they’re all coated with a thermal polyester finish.
