

# X Tuff Slab Bolster

**Meadow Burke X Tuff SB Slab Bolsters are the industry-leading alternative to metal rebar supports.**

Meadow Burke X Tuff Slab Bolsters are made with an advanced PC/ABS plastic formula for best-in-class strength and durability. They provide exceptional performance even in extreme temperatures and corrosive environments, helping contractors deliver fast and reliable rebar placement without the rust concerns of common metal supports.

### Superior Performance

- Manufactured from a proprietary PC/ABS blend which outperforms the competition in terms of strength and durability according to data produced in recent field trials.
- Meets ACI 318 Building Code requirements.

### Advanced Design

- Legs and support pins specially designed and tested to resist penetration of forming materials, extending the usable life of the deck form boards.
- Advanced support design provides industry-leading strength and optimized load distribution.
- Ridged reinforcement interface 'saddles' rebar in position, virtually eliminating movement of the reinforcing once it's placed.

### Time and Money Saving Benefits

- Easy to install
- Cost-effective, best-in-class performance.

### Improved Overall Aesthetics

- Non-corrosive PC/ABS plastic produced in concrete gray color to camouflage its appearance.
- Elimination of traditional rust concerns.
