

ST-27 Form Aligner

The ST-27 & ST-28 Form Aligner are designed to align vertical formwork. The ST-27 Standard brace consists of a length of angle iron, a self-cleaning turnbuckle and a steel toe plate. The angle iron is equipped with nail holes allowing the Form Aligner to be attached to a 2x4 or 2x6 to extend the reach of the ST-27. The turnbuckle is fabricated with coil threads for quick and easy adjustments and the steel toe plate can accept a round steel stake, be nailed to a wood stake or be inverted and nailed directly to a stud or wales. The ST-28 Form Aligner is equipped with a spade-type toe plate designed for use with modular forms and wedge bolts.

The safe working load for the Form Aligner is determined by the method of attachment and the extension lumber used.
