MBABSSB30400	4"	3.024"	30 in	200	N/A	2,400

*10' lengths are assembled by connecting four 30" pieces. Other heights available upon request.

X Tuff Slab Bolster is a new rebar support manufactured using high-performance PC/ABS plastic for best-in-class strength and durability.

The X Tuff Slab Bolster is the market-leading alternative to metal rebar supports. It eliminates concerns with rust and provides exceptional performance even in extreme temperatures and corrosive environments, helping contractors deliver fast and reliable rebar placement.

Best Performance:

- Designed, formulated and manufactured by Meadow Burke's leading team of Concrete Reinforcement Experts.
- Made of a proprietary PC/ABS blend which field trials have demonstrated outperforms the competition in terms of strength and durability.
- Meets ACI 318 Building Code requirements.

Saves Time and Money:

- The X Tuff Plus Bolster allows cost effective, best-in-class performance.

Improves Aesthetics:

- Non-corrosive PC/ABS plastic produced in a concrete gray color to camouflage its appearance.
